

The background of the top half of the page is a dark blue field filled with various market data visualizations. It features numerous upward-pointing arrows of varying sizes and orientations, some with a hexagonal grid pattern. Interspersed among these arrows are several numerical values in a white, digital-style font, including '58.04', '421.37', '-1856.41', '-37%', '56.23', '28.3', '21.15', and '49.37'. The overall effect is one of dynamic financial activity.

IRESS
MARKET DATA
SOLUTIONS

MONITOR THE MARKETS THAT INFLUENCE
THE DECISIONS YOU MAKE

THE IRESS EQUITY MARKET DATA SYSTEM IS OFFERED AS A RANGE OF SOLUTIONS, ALLOWING PROFESSIONAL AND PRIVATE TRADERS TO CHOOSE THE LEVEL OF INFORMATION AND FUNCTIONALITY THEY NEED.

All IRESS solutions are supported by the same reliable IRESS framework; however each solution is tailored in its delivery, interface and content to meet specific trader requirements.

Solutions exist for:

- Desktop
- Web
- Mobile devices.

KEY FEATURES

Common to all the IRESS solutions is the delivery of core equity data and comprehensive analysis tools, including:

- Real-time or delayed equity and derivative data for all local and global markets
- Real-time or delayed global indices
- Full market depth
- Security information
- News and company reports
- Market summaries
- Comprehensive historical time-series database
- Historical and real-time charting capabilities.

MARKET DATA

IRESS offers market data for a full range of international equity markets.

Data available extends from fundamental security pricing, full market depth and trade histories, through to charting and trade analysis.

All clients receive end of day pricing as part of their standard licence, but may choose to subscribe to delayed or live data.

NEWS

Accurate and comprehensive real-time news and market analysis is available from an extensive array of domestic and global news providers.

Clients tailor the news they receive to include the vendors and content they require, and can choose from an array of corporate, equity, economic, financial and political news services.

TRADING GATEWAY

All IRESS market data solutions support connectivity with the IRESS Order System (IOS). IOS provides direct market access or FIX based routing for trading on local and global markets.

IOS functionality varies in different IRESS solutions and according to user needs. This ranges from basic broker connectivity for order creation and order management capabilities through to a full order execution solution for buy side, sell side, retail or operator trading.

IRESS SOLUTIONS

There are four IRESS solutions, each tailored to a different audience and market data need:

- IRESS Professional
- IRESS Trader
- IRESS Investor
- IRESS Mobile.

IRESS Professional

Delivery: Desktop installed

IRESS Professional delivers dynamic market data for professional equity market participants, and is a comprehensive solution with an intuitive user interface. In addition to the standard feature set available in all IRESS solutions, IRESS offers:

- Email alerts
- Broker and market analysis tools
- Advanced option and warrant valuation and analytics
- Trade histories
- Market scan and depth replay

MONITOR THE MARKETS THAT INFLUENCE THE DECISIONS YOU MAKE

- Programming interface via Web Services and FIX
- Extensive charting module
- Corporate actions
- Top shareholders
- Reuters Research Consensus Estimates.

HISTORICAL DATA

An extensive database of historical time series data is available to all IRESS users. Time series data includes:

- Security prices
- Exchange rates
- Commodity prices
- Economic data
- Market statistics.

IRESS' extensive charting module is available to all users and supports detailed analysis of the data available.

DATA INTEGRATION

All IRESS information is accessible to third party applications. At a basic level, the IRESS Excel add-in lets you create live price links and import core security information into Microsoft Excel spreadsheets. For more advanced needs, a programming interface exposes the entire IRESS database for use in proprietary macros and systems.

TRADING GATEWAY

IRESS is the underlying platform onto which a range of IRESS trading and portfolio systems are launched, including:

- IOS – IRESS Order System
- IPS – IRESS Portfolio System
- FTS – IRESS Funds Trading System
- ETS – IRESS Equity Trading System
- RMS – IRESS Risk Management System.

SUPPORT

Dedicated IRESS account executives link IRESS clients with the rest of the IRESS Market Technology team to:

- Co-ordinate installations and upgrades
- Train users
- Solve problems
- Assist users in getting full use and maximum value out of IRESS.

The IRESS helpdesk comprises people with market knowledge and a solid understanding of the IRESS architecture. The helpdesk works closely with the account executives, systems engineers and the database team to ensure all issues are followed through to a successful and speedy conclusion.

CONNECTING TO IRESS

To ensure maximum performance and data reliability, different communication methods are available. Depending on the number of users accessing IRESS, clients can connect via dedicated communications or the internet.

IRESS Trader

Delivery: Web

IRESS Trader is a dynamic, browser based version of IRESS, which delivers equity information and trading functionality to private investors.

Leveraging off the proven IRESS architecture, market information is made available through standard internet access.

IRESS Trader delivers real-time equity and derivative prices and contains comprehensive value-add tools, such as:

- Email alerts
- Trade histories and analysis
- Real-time portfolio analysis
- Excel add-in
- Trading via OMS
- Real-time, delayed or end of day data.

WHITE LABEL INTEGRATION

Brokers can deliver IRESS Trader through their own website, and tailor it with their colour schemes and branding. They can also tailor the data and source information their clients receive. The ability to link internal research and client portfolio holdings can add significant value to the services that a retail broker provides.

TRADING

Clients who access IRESS Trader via their broker can create orders and monitor their trades and portfolios online. Trade and portfolio updates are performed across an interface with the IRESS Order System (IOS).

IRESS Investor

Delivery: Web

IRESS Investor is an entry-level equity information and trading system which delivers basic market information via the internet. Its simple to use interface makes it accessible to all users. Like IRESS Trader, brokers can re-badge this product to reflect their branding.

IRESS Mobile

Delivery: Mobile device

IRESS Mobile delivers core market information via various customised applications for handheld devices.

Subscription to IRESS Mobile is available with any other product in the suite.

“OUR RANGE OF APPLICATIONS AND PROGRAMMING INTERFACES DELIVER FUNDAMENTAL MARKET DATA VIA THE WEB OR DEDICATED TELECOMMUNICATIONS. UNDERPINNING ALL DELIVERY METHODS IS THE RELIABLE, PROVEN IRESS BACK-END INFRASTRUCTURE.”
