## QUOTE - WATCHLIST

Quote – Watchlist provides comprehensive real-time market information for securities, indices, currencies and other instruments. Quote data includes price, bid, ask, volume and a trend chart.

You can view quotes for ad-hoc securities, access your webIRESS watchlists or create new watchlists. You can also open the News and Depth functions from a security in a watchlist.

Quote - WATCHLIST*					
Security:					
Code	R	Last	+/-	%	Bid
EURAUD		1.6936	-0.0016	-0.09	1.6933
XTJ		1129.7	-6.9	-0.61	0

CBA		5040	40	0.8	5040
NAB		3018	-8	-0.26	3018

## DEPTH

Depth displays a snapshot of non-streaming pricing information for a specified security, and lists the bids and asks in the market for that security.

Information available includes the price the traders want to trade at and the corresponding volume to be purchased or sold.

## LAYOUT

The Depth screen displays two levels of information:

- **Quote** – Live pricing information for the security.
- **Depth** – Bids and asks in the market for the security.

## VIEW MODES

The Depth function operates in two modes, which determine the type of depth information that displays:

- **Depth** - Consolidated values for bids and asks. Information includes the volume, price and number of orders at each price level.
- **Detail** - Details of individual bids and asks rather than cumulative values for each price level.

# IRESS MOBILE BLACKBERRY

## NEWS

The News screen lists live company reports and general world news. The news announcements display as headlines, for which you can display the underlying story or document.

You can filter the news headlines for a selected security.

Announcements are available for all news vendors you subscribe to. For information about available vendors, contact IRESS.

## INSTALLATION

To run IRESS Mobile on your BlackBerry, you need a connection to a BES Mobile Data Service or a GPRS internet access point.

You can download IRESS Mobile direct to your BlackBerry over the airway (OTA). Alternatively, you can download IRESS Mobile and then use the application loader to install it to your handset.

## TECHNICAL REQUIREMENTS

IRESS Mobile for BlackBerry requires the following:

### IRESS ACCOUNT

A valid IRESS username, company and password with IRESS Mobile login enabled.

### BLACKBERRY HANDSET

A BlackBerry Java-based handset, with minimum handset software version 4.1 or higher.

Contact your service provider to upgrade your handset software. Visit BlackBerry Support for a list of service providers.

### INTERNET ACCESS

You need one of the following:

- BES Mobile Data Service
- ability to connect to a GPRS internet access point
- a TCP internet access point specified for your handset.

If you are using a BES server, the machine hosting the BES Mobile Data Service must have visibility for outbound connection to port 6080 on machine:

- mobiledf.iress.com.au - Australian users
- mobiledf.iress.ca - Canadian users.

### DOWNLOAD ACCESS

The IT policy for the handset must allow third party applications. The property "Disallow Third Party Application Downloads" of the IT policy must be set to FALSE.

## SUPPORT

The IRESS Help Desk and the IRESS Internet Product team provide ongoing product and technical support.

Online help is available at <http://mobile.iress.com.au>.
